Why Does Not The Stomach Digest Itself?
An Unsolved Problem, Which Has Puzzled Physicians of All Schools.

A Trial Package of Stuart's Dyspepsia Tablets Sent Free.
There seems to be no logical reason why the stomach should not digest itself when we consider the fact that it secretes digestive juices, and that acids which are powerful enough to disintegrate and digest meats, eggs, fruits, cereals, vegetables and other forms of food taken into it.

In animals which were killed while in full digestion, the stomach has undergone complete self-digestion after death, when the body was kept warm; and in human beings who have died suddenly, while digestion was going on, it was found that the stomach had not only digested the food, but also the liver, pancreas, spleen, and portions of the intestines.

The question naturally presents itself, "What protects the stomach from self-digestion?" Dr. Hunter declared that the "principle of life" in living things protected this organ from being digested by its own fluids, but Dr. Bernard successfully demonstrated that the stomach does digest itself, when introduced through a fistula or artificial opening into the stomach of a dog, undergoes complete digestion, and Dr. Pavy, through similar experiments, found that the same was true of rabbits' ears.

While the normal stomach is immune from self-digestion, there are many cases on record, however, in which a long-standing gastritis, and perverted digestion, has completely digested the eaten away the mucous membrane lining of the stomach, and in some instances has engendered gastric ulcer, which ate its way clear through the stomach wall, and caused a fatal peritonitis.

In all cases of perverted function of the stomach, which manifests itself by the numerous well known symptoms of indigestion and dyspepsia, Stuart's Dyspepsia Tablets are a corrective, restoring it to a normal condition, toning up the secretory glands, as well as the lacteal glands, which absorb the food, and at the same time assisting the stomach in the process of digestion, and preventing all possibility of such conditions arising as will cause perverted function, gastritis, gastric ulcer, or the eating away of the mucous membrane of the stomach.

Stuart's Dyspepsia Tablets are exceedingly powerful digestives, a single grain being sufficient to digest 3000 grains of food, including meats, vegetables, cereals, etc. They digest all burdensome and starchy foods perfectly well. Whenever the stomach is in a weakened condition, and so lacking in tone, that it furnishes an insufficient amount of gastric juice, such symptoms as heartburn, biliousness, headache, belching of gas and sour eructations are sure to appear and make one feel generally miserable.

Such symptoms, can, however, be overcome and done away with at once. Simply take one or two of Stuart's Dyspepsia Tablets and forget all about your digestive troubles. They do their work promptly and thoroughly, every particle of food being completely digested, and fermentation, decomposition, and flatulence arising from undigested food being relieved and cured. Purchase a box from your druggist today, price 50 cents. Also send us your name and address for free sample. Address F. A. Stuart Co., 150 Stuart Bldg., Marshall, Mich.

SAYS HE DID NOT EVADE ARREST

Roswell Man Now in Prison Thinks His Folks Live Near Ysleta.

Roswell, N. M., Jan. 10.—George Musgrave, now in jail here on the charge of killing George Parker, Oct. 13, 1896, says he would not have been captured nor even identified, if he had cared to evade the law, and that his capture is the result of his having said to a man in Colorado, that he expected and intended to return to Roswell some time and stand trial.

He says his trouble with Parker was caused by Parker himself. He asserts that he has lived "on the square" in every way and has made a living mostly by buying and selling cattle in Colorado, Iowa, Nebraska, and other northern states.

Musgrave thinks his parents, Mr. and Mrs. Bennett Musgrave, are living somewhere near Ysleta, Texas.
